

Guidelines on the use of the "Green Solutions Plugin"

1. Subject

The plugin for the Green Solutions system maps the complete functionality of the online platform of the same name. In order to guarantee the user of Green Solutions a uniform and functionally identical scope, the complete functionality should be integrated.

2. General

- The window of the system should always be positioned in the centre of the screen.
☐ Taken into account
- The created signage should be displayed as a thumbnail in the "documents" of the product.
☐ Taken into account

3. Functions

The following functions should be implemented:

| Function | Description |
|----------------|--|
| Create signage | <p>On the one hand, this function should be directly accessible via the respective product (plant or product) and on the other hand, it should be available as a basic function for creating signage. It should be possible to save and manage the created labels locally for reuse. The maximum possible information should be transferred to the interface, e.g. name, price, EAN, etc..</p> <ul style="list-style-type: none"><input type="checkbox"/> General access (independent of product)<input type="checkbox"/> Access via the product<input type="checkbox"/> Save PDF locally<input type="checkbox"/> Max. information transfer |
